Custom Less

Custom Less is a new preference introduced in Tiki 15 which replaces the (broken) theme generator available before the move to Bootstrap.

It can be found on the Customisation tab on the Look & Feel Control Panel.

This is an example of a fairly complete theme customisation of Yeti which seems to work just about everywhere in Tiki.

<table>
<thead>
<tr>
<th>Pastel Minty</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>@gray-base:</td>
<td>#597977;</td>
</tr>
<tr>
<td>@brand-primary:</td>
<td>#9ab6b4;</td>
</tr>
<tr>
<td>@gray:</td>
<td>#9ab6b4;</td>
</tr>
<tr>
<td>@border-radius-base:</td>
<td>3px;</td>
</tr>
<tr>
<td>@border-radius-large:</td>
<td>4px;</td>
</tr>
<tr>
<td>@border-radius-small:</td>
<td>2px;</td>
</tr>
<tr>
<td>@table-bg-accent:</td>
<td>#f0f7f6;</td>
</tr>
<tr>
<td>@table-bg-hover:</td>
<td>#cff3f1;</td>
</tr>
<tr>
<td>@navbar-default-link-hover-bg:</td>
<td>#597977;</td>
</tr>
<tr>
<td>@navbar-default-link-active-bg:</td>
<td>#597977;</td>
</tr>
</tbody>
</table>

You might be able to try it out here using this perspective. Note that the first time it customises a theme it will take a minute or two to recompile the CSS.
