About the "infobox"

The "infobox" code will work to make a box in any theme, but there's an `.infobox` class in Tikipedia's CSS file that styles the box and its contents to match the MediaWiki infobox:

```
.infobox {
  border: 1px solid #aaa;
  border-spacing: 3px;
  background-color: #f9f9f9;
  color: black;
  margin: 0.5em 0 0.5em 1em;
  padding: 0.2em;
  font-size: 88%;
  line-height: 1.5em;
}
.infobox img {
  margin-top: 6px;
}
.infobox h3,
.infobox h4 {
  font-weight: bold;
  background-color: #c0c0c0;
  padding: 4px;
  text-align: center;
  font-family: sans-serif;
  margin: 0;
}
.infobox h3 {
  font-size: 120%;
}
.infobox h4 {
  font-size: 105%;
}
```

```
}
```

The details should be adjusted as needed to match the appearance of the theme. The box should be inside a div with Bootstrap grid and positioning classes, etc. to be less than full width.
