|                                                                                                                                                                                                                                          |              |                                                                                                                                                                                                                                                               |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Underground</b> (Revision: 20404 - 2009-07-29 12:35:21 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=20404&view=rev]                                                                                                    | See changes. | nocache] - [FIX] Admin icons (in box on tiki-admin.php) repeated and weren't centered.                                                                                                                                                                        |
| <b>Underground</b> (Revision: 20403 - 2009-07-29 12:08:21 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=20403&view=rev]                                                                                                    | See changes. | nocache] - [FIX] Topbar suckerfish menu item backgrounds weren't working.                                                                                                                                                                                     |
| <b>MilkyWay</b> (Revision: 20325 - 2009-07-24 05:07:06 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=20325&view=rev]                                                                                                       | See changes. | nocache] - [FIX] Edit help Big Blue Button wasn't implemented. Get updated file here nocache].                                                                                                                                                                |
| <b>Dark Shine, Green Blog, Judy, MilkyWay, Ohia, Smooth, Tikipedia, Twist, Underground</b> (Revision: 20174 - 2009-07-16 08:17:40 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=20174&view=rev]                            | See changes. | nocache] - [ENH] Make header multilingual, following r20119. (Site title, etc. now translatable strings - other themes also have this feature by default (coming in Tiki 3.2), but these themes have their own tiki-site_header.tpl so needed to be updated.) |
| <b>Green Blog, Judy, MilkyWay, Ohia, Smooth, Tikipedia, Underground</b> (Revision: 20149 - 2009-07-15 13:59:40 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=20149&view=rev]                                               | See changes. | nocache] [FIX] Conditional comment with br for IE can't have space between comment tags, to have 0 height (should slightly improve page header area in IE).                                                                                                   |
| <b>Tikipedia</b> (Revision: 19833 - 2009-06-28 07:56:48 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19833&view=rev]                                                                                                      | See changes. | nocache] - [MOD] Updated for better synchronization with Tiki 3.0/3.1 files, and CSS improvements.                                                                                                                                                            |
| <b>Judy</b> (Revision: 19676 - 2009-06-18 13:02:20 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19676&view=rev]                                                                                                           | See changes. | nocache] - [ENH] Improvement of highlight and simplebox classes.                                                                                                                                                                                              |
| <b>Judy</b> (Revision: 19675 - 2009-06-18 12:19:09 +0000 - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19675&view=rev]                                                                                                            | See changes. | nocache] - [FIX] Bad "div.calbuttonBox a" contrast (thanks to xavi).                                                                                                                                                                                          |
| <b>Judy</b> (Revision: 19671 - 2009-06-18 02:42:17 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19671&view=rev]                                                                                                           | See changes. | nocache] - [FIX] Custom code support added (but should be used carefully; too much height causes overlap with middle).                                                                                                                                        |
| <b>Tikipedia</b> (Revision: 19670 - 2009-06-18 01:42:03 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19670&view=rev]                                                                                                      | See changes. | nocache] - [FIX] Correction of some wrong files committed earlier.                                                                                                                                                                                            |
| <b>Milky Way</b> (Revision: 19606 - 2009-06-16 14:17:31 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19606&view=rev]                                                                                                      | See changes. | nocache] - [FIX] CSS menu hover property was only set for menuSections instead of all level0 li's.                                                                                                                                                            |
| <b>Milky Way</b> (Revision: 19604 - 2009-06-16 12:59:26 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19604&view=rev]                                                                                                      | See changes. | nocache] - [FIX] Updated to include new image files.                                                                                                                                                                                                          |
| <b>Milky Way</b> (Revision: 19603 - 2009-06-16 12:55:45 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19603&view=rev]                                                                                                      | See changes. | nocache] - [NEW] Forgot these retro spacers.                                                                                                                                                                                                                  |
| <b>Andreas08, Candii Clouds, Dark Shine, Eatlon, Faulkner, Kubrick, LiteJazz, Planetfall, Twist</b> (Tiki 3 versions) (Revision: 19570 - 2009-06-15 17:51:49 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19570&view=rev] | See changes. | nocache] - [FIX] .cssmenu_vert ul margin-left needs to be limportant for IE7 to recognize it.                                                                                                                                                                 |
| <b>Green Blog</b> (Revision: 19479 - 2009-06-13 02:11:28 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19479&view=rev]                                                                                                     | See changes. | nocache] - [FIX] Added PHPL menu .subframe background.                                                                                                                                                                                                        |
| <b>Green Blog</b> (Revision: 19388 - 2009-06-09 06:16:27 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19388&view=rev]                                                                                                     | See changes. | nocache] - [FIX] File needed updating before initial commit.                                                                                                                                                                                                  |
| <b>Faulkner (T3)</b> (Revision: 19265 - 2009-06-01 16:12:41 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19265&view=rev]                                                                                                  | See changes. | nocache] - [FIX] More CSS redundancy removed; todo: fix topbar cssmenu in IE6.                                                                                                                                                                                |
| <b>Eatlon (T3)</b> (Revision: 19259 - 2009-06-01 12:45:48 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19259&view=rev]                                                                                                    | See changes. | nocache] - [FIX] More CSS redundancy removed; page header and menus improved, etc.                                                                                                                                                                            |
| <b>Twist (T3)</b> (Revision: 19258 - 2009-06-01 08:30:12) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19258&view=rev]                                                                                                           | See changes. | nocache] - [FIX] More CSS redundancy removed; page header improved; ie6 css put in separate file.                                                                                                                                                             |
| <b>Smooth (T3)</b> (Revision: 19256 - 2009-06-01 06:09:17 +0000) - [http://tikiwiki.svn.sourceforge.net/tikiwiki/?rev=19256&view=rev]                                                                                                    | See changes. | nocache] - [ENH] More flexible background image arrangement; ie6 selectors moved to separate file (todo: fix header/cssmenu in ie6).                                                                                                                          |
