Twist theme

👤 Gary Cunningham-Lee - Mon 05 of Feb, 2007 05:29 GMT-0000 -

A new theme — Twist — has been contributed by gg and can be downloaded now. The Twist theme visually floats the Tiki pages on a dark blue background, and has custom graphics for standard menus. (Since themes.tw.o normally uses PHP Layers menus in the left column, please visit the Twist and Site Identity demo pages to see the Twist menu style.)

Please see the Twist wiki page for more information, and use the themes.tw.o forums if you have questions or comments. Thanks to Gary (gg) for this theme!
