

Customization_content_removed

This site is a bit buggy, related to JavaScript maybe so I removed the custom code temporarily to see if there was some conflict.

Custom code just before the body tag:

```
{literal}<script src="dl184"></script>{/literal}

{literal}<script type="text/javascript">
var gaJsHost = (("https:" == document.location.protocol) ? "https://ssl." : "http://www.");
document.write(unescape("%3Cscript src='" + gaJsHost + "google-analytics.com/ga.js'
type='text/javascript'%3E%3C/script%3E"));
</script>
<script type="text/javascript">
try {
var pageTracker = _gat._getTracker("UA-2110868-5");
pageTracker._trackPageview();
} catch(err) {}</script>{/literal}

{literal}
<!-- Piwik -->
<script type="text/javascript">
var pkBaseURL = (("https:" == document.location.protocol) ? "https://piwik.tiki.org/" :
"http://piwik.tiki.org/");
document.write(unescape("%3Cscript src='" + pkBaseURL + "piwik.js'
type='text/javascript'%3E%3C/script%3E"));
</script><script type="text/javascript">
try {
var piwikTracker = Piwik.getTracker(pkBaseURL + "piwik.php", 4);
piwikTracker.trackPageView();
piwikTracker.enableLinkTracking();
} catch( err ) {}
</script><noscript><p></p></noscript>
<!-- End Piwik Tag -->
{/literal}
<meta name="google-site-verification" content="OKHyWtoBAnRUctKvFQmKl2x1cAPGnHf8y_h8zUu-aeo"
/>
```

Custom JavaScript

```
$(document).ready(function() {
    luluParallax();
});
```
