Find
Legacy_themes

These are themes that originally were included in the Tiki archive but have been removed, for license incompatibility or to reduce the archive size. They work fine with older TikiWiki versions, but aren't current with new Tiki versions, so they may not support all current Tiki features and style elements. Available at the [TikiMods](#) archive, they are listed here for the sake of completeness.

These themes' CSS and template files were removed when the site was upgraded to TikiWiki 2, and haven't been added back yet. When a method is decided on for displaying these themes again (many of which don't work well or at all in Tiki 2), they'll be brought back. Sorry for the inconvenience.
