This web site uses Tiki CMS/Groupware, also known as TikiWiki, to store and display content. Tiki is a powerful, Open Source, web-based Groupware and Content Management System (CMS). It can be used to create all sorts of Web applications, sites, portals, intranets and extranets. Tiki is developed by a large number of contributors that form the [Tiki community](#).

Tiki, in turn, makes use of the following:

[PHP](#) scripting language. PHP is a widely-used general-purpose scripting language that is especially suited for Web development.

[MySQL](#) *"The MySQL database server is the world's most popular open source database. Over six million installations use MySQL to power high-volume Web sites and other critical business systems."*

[ADOdb](#) database abstraction library

[Smarty Template Engine](#) *"Smarty is a template engine for PHP. More specifically, it facilitates a manageable way to separate application logic and content from its presentation."*

[RDF](#) *"The Resource Description Framework (RDF) is an infrastructure that enables the encoding, exchange and reuse of structured metadata."* Newsfeeds (RSS) are made possible by RDF.

[phpMyAdmin](#) MySQL database administration tool. phpMyAdmin is an essential tool for any Web site that uses MySQL and PHP.

This page can be an alternative to having the software icons in the footer. One icon or text can link to this page instead. See [zuka](#).
