Find

RecipeRestoreCss

(Mirror of <http://tikiwiki.org/tiki-index.php?page=RecipeRestoreCss> - Should probably be relocated to this site.)

Provide a report on CSS classes used in a stylesheet

Typical Uses

- to identify missing classes when adapting a theme to a newer release of Tiki
- to provide a report prior to merging changes between different themes
- to help with normalising classes across groups of themes

Sources

bin/stripcomments.pl

```
#!/usr/bin/perl
# From the Perl FAQ
# written by Jeffrey Friedl and later modified by Fred Curtis
$/ = undef;
$_ = <>;
s#/\*[\^]*\*+([\^/*][\^]*\*+)*|("(\.|\.[^\"]\)*"|'(\.|\.[^\']\)*'|.[^\s"'\\]*)#\$2#gs;
print;
```

bin/stripbraces.pl

```
#!/usr/bin/perl
$/ = undef;
$_ = <>;
s#{([\^{}]*)}##gs;
```

```
print;
```

bin/csscheck.sh

```
#!/bin/bash
./stripbraces.pl \ $1 \
| ./stripcomments.pl \
| sed -e "s/,[ ]*/\n/g;" \
| sed -e "s/^[ ]*/\n/g;" \
| sed -e "s/[ ]*/\n/g;" \
| egrep -v "^[ ]*" \
| sort \
| uniq
```

Bugs

- properties between braces are often important, but csscheck.sh provides no assistance there
