Find
Customization_content_removed

This site is a bit buggy, related to JavaScript maybe so I removed the custom code temporarily to see if there was some conflict.

Custom code just before the body tag:

```
{literal}<script src="dl184"></script>{/literal} {literal}<script type="text/javascript"> var gaJsHost
= (("https:" == document.location.protocol) ? "https://ssl." : "http://www.");
document.write(unescape("%3Cscript src='" + gaJsHost + "google-analytics.com/ga.js'
type='text/javascript'%3E%3C/script%3E")); </script> <script type="text/javascript"> try { var
pageTracker = _gat._getTracker("UA-2110868-5"); pageTracker._trackPageview(); } catch(err)
{}</script>{/literal} {literal} <!-- Piwik --> <script type="text/javascript"> var pkBaseUrl =
(("https:" == document.location.protocol) ? "https://piwik.tiki.org/" : "http://piwik.tiki.org/");
document.write(unescape("%3Cscript src='" + pkBaseUrl + "piwik.js'
type='text/javascript'%3E%3C/script%3E")); </script><script type="text/javascript"> try { var
piwikTracker = Piwik.getTracker(pkBaseUrl + "piwik.php", 4); piwikTracker.trackPageView();
piwikTracker.enableLinkTracking(); } catch( err ) {} </script><noscript><p></p></noscript> <!--
End Piwik Tag -->{/literal} <meta name="google-site-verification"
content="OKHyWtoBAnRUctKvFQmKl2x1cAPGnHf8y_h8zUu-aeo" />
```

Custom JavaScript

```
$(document).ready(function() { luluParallax(); });
```
