Description	Created	LastModif ▲	Last modified by	Comments
<p>structures -&gt; the structures behave weird: the menu items do not appear in the "module_menu" as they would be set in the structures tree just click on this link: <a href="http://pascalstjean-10536-4948.show.tikiwiki.org/tiki-index.php?page=Bootstrap">http://pascalstjean-10536-4948.show.tikiwiki.org/tiki-index.php?page=Bootstrap</a> <a href="#">↗</a> usr: admin / pw: admin You will find a horizontal structure menu under the main themes navigation menu (top bar). Please compare that with the structure tree and you will see what I mean. <a href="http://pascalstjean-10536-4948.show.tikiwiki.org/tiki-edit_structure.php?page=Bootstrap&amp;page_ref_id=11">http://pascalstjean-10536-4948.show.tikiwiki.org/tiki-edit_structure.php?page=Bootstrap&amp;page_ref_id=11</a> <a href="#">↗</a> usr: admin / pw: admin This might be connected to LPHs change of menu behaviour from superfish to bootstrap You can dump a snapshot of the installation (Running trunk svn) with one click at any time in the bugtracker/wishlist: <a href="http://dev.tiki.org/item4948">http://dev.tiki.org/item4948</a> <a href="#">↗</a></p>	Tue 19 of Nov, 2013 20:23 GMT-0000	Thu 21 of Nov, 2013 19:06 GMT-0000	pascalstjean	0
<p>Clicking on an item within Tab 2, 3 etc... Doesn't go back to the proper tab. Always goes back to Tab 1 <a href="http://pascalstjean-10536-4948.show.tikiwiki.org/tiki-admin_modules.php?um_edit=menu_42&amp;cookietab=2#editcreate">http://pascalstjean-10536-4948.show.tikiwiki.org/tiki-admin_modules.php?um_edit=menu_42&amp;cookietab=2#editcreate</a> <a href="#">↗</a> as you can see in the link, "cookietab=2" this variable is not being supported right now</p>	Tue 19 of Nov, 2013 18:35 GMT-0000	Thu 21 of Nov, 2013 19:09 GMT-0000	pascalstjean	0
<p>In order for images to be responsive, we need to use percentage and not a fixed Pixel variable. The current Tiki IMG plugin takes Pixels. We should enforce percentage as to not break the grid</p>	Tue 19 of Nov, 2013 18:38 GMT-0000	Thu 21 of Nov, 2013 19:09 GMT-0000	pascalstjean	2 luci-Wed 27 of Nov, 2013
<p>I tried to move the "Bootstrap Component XYZ" pages one menu level deeper (in the structure tree), but the "save" button disappeared from Tiki 12 to Tiki 13. So I cannot apply the reorganised structure menu items (pages). <a href="http://pascalstjean-10536-4948.show.tikiwiki.org/tiki-edit_structure.php?page=Bootstrap&amp;page_ref_id=11">http://pascalstjean-10536-4948.show.tikiwiki.org/tiki-edit_structure.php?page=Bootstrap&amp;page_ref_id=11</a> <a href="#">↗</a> usr: admin pw: admin You can dump a snapshot of the installation (Running trunk svn) with one click at any time in the bugtracker/wishlist: <a href="http://dev.tiki.org/item4948">http://dev.tiki.org/item4948</a> <a href="#">↗</a></p>	Tue 19 of Nov, 2013 20:29 GMT-0000	Thu 21 of Nov, 2013 19:10 GMT-0000	pascalstjean	1 pascalstjean-Thu 21 of Nov, 2013
<p>when using the drag and drop modules to move a module around. The save button does'nt show up {flash type="url" movie="display131" width="667" height="465"}</p>	Fri 22 of Nov, 2013 18:48 GMT-0000	Fri 22 of Nov, 2013 18:48 GMT-0000	pascalstjean	0
	Sat 23 of Nov, 2013 15:17 GMT-0000	Sat 23 of Nov, 2013 15:17 GMT-0000	marclaporte	1 chibaguy-Sun 24 of Nov, 2013
<p>{flash type="url" movie="display133" width="1075" height="499"}</p>	Sat 23 of Nov, 2013 15:21 GMT-0000	Sat 23 of Nov, 2013 15:21 GMT-0000	marclaporte	2 luci-Wed 27 of Nov, 2013
<p>First: <a href="#">Remove current calendar templates and converge on FullCalendar</a> <a href="#">↗</a> And then, make Bootstrap &amp; responsive</p>	Sun 24 of Nov, 2013 21:35 GMT-0000	Sun 24 of Nov, 2013 22:02 GMT-0000	marclaporte	0
<p>Something like this: <a href="http://minhur.github.io/bootstrap-toggle/">http://minhur.github.io/bootstrap-toggle/</a> <a href="#">↗</a></p>	Mon 25 of Nov, 2013 08:01 GMT-0000	Mon 25 of Nov, 2013 08:01 GMT-0000	marclaporte	0
<p>layout is basic, when you turn the prefs on, the columns appear fine, but when you navigate away to any other page, suddenly only the center column is visible</p>	Tue 26 of Nov, 2013 09:53 GMT-0000	Tue 26 of Nov, 2013 09:53 GMT-0000	gezza	0

Several features in Tiki are themed via [jQuery UI ThemeRoller](#), and we have a jQueryUI theme picker, which is distinct from the global Tiki theme picker.

- <http://arshaw.com/fullcalendar/docs/display/theme/>
- Spreadsheet
- etc.

This was a problem before Bootstrap, and we need to find a way to address this.
