The Candii Clouds theme is available for TikiWiki 1.10 beta. The original Candii Clouds theme is by Mark Schulz (elpirtxis), released under the Creative Commons Attribution 2.5 license. For TikiWiki the theme uses one table for page layout (necessary due to IE7's lack of CSS display:table support). The theme can be downloaded from the Candii Clouds [\[external link\]](#).
Until this site is updated to version 1.10, see Candii Clouds in action at [\[external link\]](#).
